

**solutions
built
around
you**

At EdICT we provide ICT solutions, built around you.

EdICT can help you to clarify your direction, identify your needs and deliver the system, skills and knowledge necessary to meet your ICT objectives.

We listen, we design and we deliver solutions that are as unique as you are.

THIS IS EDICT CONSULTING. IT IS UNIQUE; IT IS BUILT AROUND YOU AND IT WORKS!

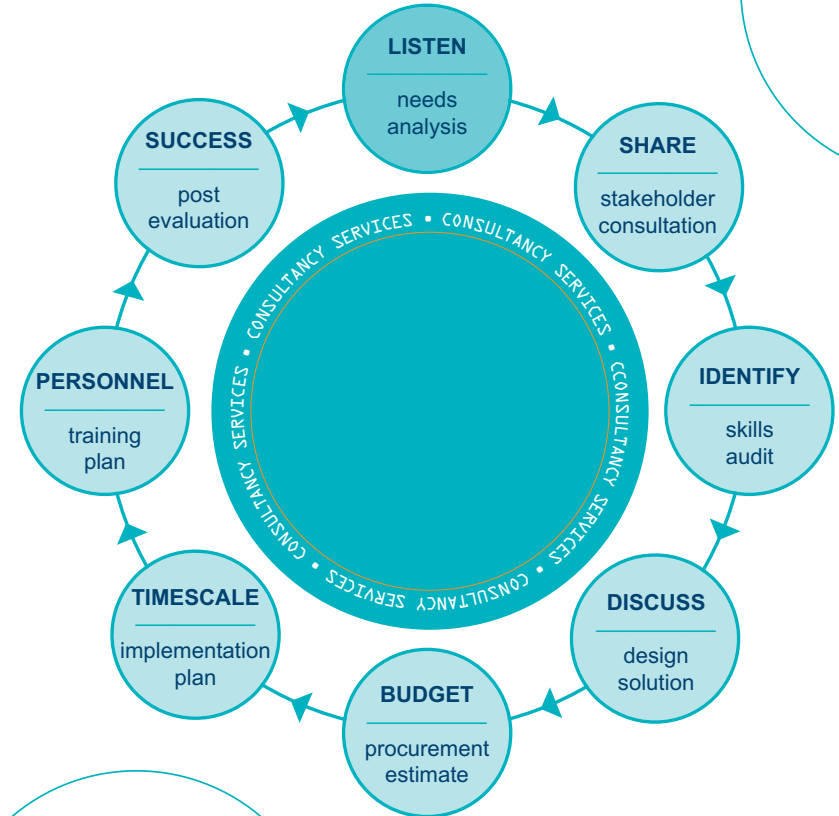

ICT is the technology you use to share information and communicate within your environment. However, with many systems being bought out-of-the-box, ICT can also become a catalyst for stress, frustration and wasted time.

EdICT can help you avoid the perils of badly planned ICT through our unique approach of listening, designing, solving and delivering.

EdICT solutions are specific to your circumstances, individual to your needs and compatible with your budget and timescale.

Edict solutions also acknowledge available resources and skills within your organisation to encourage 'buy-in' from all stakeholders.

EdICT's comprehensive process includes preparation, procurement, implementation, training and evaluation.

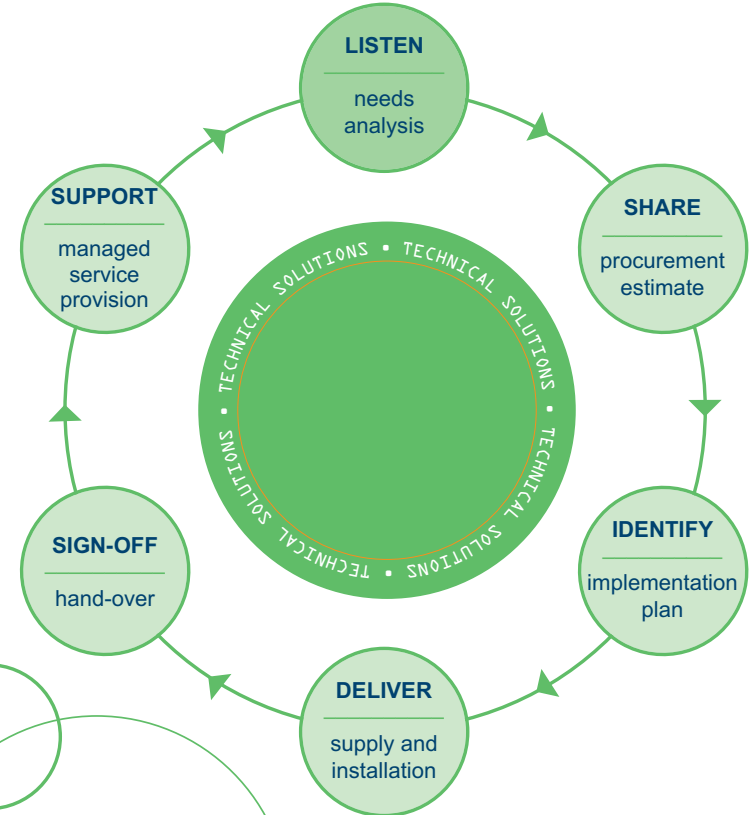

THIS IS EDICT TECHNICAL SOLUTIONS. IT IS UNIQUE! IT IS BUILT AROUND YOU AND IT WORKS!

EdICT can identify, supply and install all the ICT needs and services you require, including custom built solutions. As an independent company, we are not tied to specific brands, so we are always able to provide the most appropriate equipment for the job.

EdICT has a proven track record for attention to detail at every stage of the process, including post installation customer service.

EdICT has considerable experience in schools and public sector environments, having supplied and installed everything from multimedia projectors and interactive whiteboards to complete ICT infrastructures, inclusive of power, data and communication links.

EdICT products and services are backed by comprehensive guarantees and optional managed service solutions.

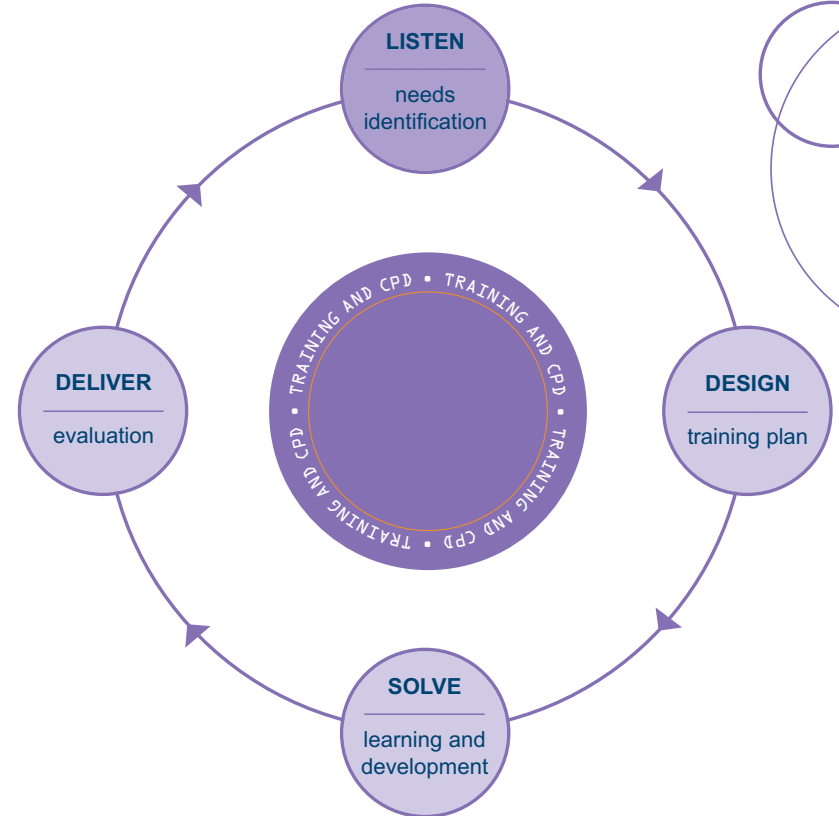

THIS IS EDICT TRAINING. IT IS UNIQUE; IT IS BUILT AROUND YOU AND IT WORKS!

EdICT can help you identify any additional knowledge and skills required to get the most from your ICT system.

EdICT's team of experienced training advisers work in partnership with our consultants and technicians to deliver relevant training that completes one of the UK's most comprehensive ICT Services.

EdICT's training and Continuing Professional Development (CPD) plans are individually designed to meet your specific needs. This targeted approach avoids wasted time covering things you already know or don't need to know.

EdICT recognise that professional development should be continuing, therefore we provide the tools you need to reflect on your development and identify future requirements.

EdICT has created a series of 'off-the-shelf' programmes that can easily be packaged to meet the requirements of both public and private sectors. These easy to use, on-line solutions are the result of over a decade of research and development in The Continuing Professional Development sector.

CPD IN ICT - AN ONLINE CONTINUAL PERSONAL DEVELOPMENT SYSTEM THAT'S EASY TO USE, ANYWHERE, ANYTIME.

CPD in ICT

EdICT **CPD in ICT** is part of our schools ICT solutions portfolio, although it can be applied to any CPD environment. It is easy to use, with a clear interface, comprehensive tracking and remote log-on functionality for full web based access. EdICT CPD in ICT can be customised and supported with your own specific distance learning criteria, branding and reporting.

EdICT CPD Portfolio - an evaluation tool that tags CPD objectives to recognised policy frameworks and encourages professional reflection. CPD Portfolio determines the success criteria of each CPD objective and allows you to evaluate progress against agreed criteria.

EdICT Needs Identification - Identify and fulfil your training needs based on a predetermined skill set. Needs Identification or Analysis is an incredibly simple on-line training portal providing access to specific units of study and overview.

EdICT Achievement System - Designed as a tool for teaching staff to record and update an achievement portfolio for each of their students. An individual pupil's achievements can then be tracked throughout their education, providing an all round picture of the student to enhance their employment opportunities and reflect on personal progress.

If you would like to see a demonstration of how any of these systems work, please email enquiries@edict.co.uk or call EdICT on 0141 582 0551.
